

LET'S ABOLISH CAPITALISM NOW

THE WARS...

The disastrous situation in Lebanon for a few weeks now and all the horrible images we see on the news every day started supposedly over the capture of two Israeli soldiers. It's not the first time that these captures occurred, they've happened before and resulted in prisoner exchanges with Hezbollah. This time though the operation had been planned by Israel long in advance. Fabricated incidents and minor hostilities have been used as an excuse for starting a war between nations many times in history. Almost all the news channels and especially the American ones are blaming Hezbollah for the destruction of Lebanon and always state that Syria and particularly Iran are backing Hezbollah. Notice that after all the death and destruction in Lebanon, this provides an additional excuse for either Israel or the U.S or both to attack Iran and Syria besides the supposed nuclear program in Iran. We all know that the U.S provides weapons to Israel and Turkey but only the shipment of aid from Iran to Hezbollah is mentioned. Large numbers of bombs with depleted uranium are shipped to Israel from the U.S, which can have disastrous consequences for the region. So, the oil rich middle-east is being fully militarily controlled by the U.S with the good help of its faithful attack dog Israel. And we all know the help provided by the government here in the UK and by all other NATO participants..

Israel is no better than the Nazis. How ironic. The same techniques are being used as were used by Nazis against them and other occupied people in World War II. They are bombing the civilian infrastructure and denying water, electricity, medical care and sanitation to people. This was also practised by Nazis and now by Israelis it is collective punishment. All Lebanese are paying for the capture of two Israeli soldiers by Hezbollah. Nazis obliterated from the face of earth whole villages for similar reasons. And of course Israel will deny that it is attacking civilians, just as the US denied it...

.AND THE WAR

How many of the TV viewers all around the world and ourselves have thought that these clashes in Lebanon are a picture of a generalised and systematic war that has been practised effectively for many years now by the state and our bosses against us? War is not only taking place in Lebanon and Iraq. It's a daily reality in Capitalist centres all over the world, here in London, in New York, in Paris, everywhere. The opponents have taken shape over many years now. On the one side are the mechanisms of exploitation and oppression, national and supranational states, local and global bosses, national capital and the multinational companies together with their blind followers, and their weaponry is getting refined and richer

all the time. The blocked wages, temporary and uninsured work, the fear of getting sacked and unemployment, the privatisation of education and health, the devastation of the environment in the name of growth, intellectual poverty with TV garbage and the foolish life-style of meaningless entertainment and frantic consumerism, the commercialisation of human relationships and feelings, are the tools which with the bosses increase their profits and ensure subjugation to their appetites. Their war against us is ongoing. Capitalism is widening its control over societies and at the same moment state repression is elected as the basic tool for fitting its orders. With furious mania it attacks the most underestimated category of working class, the immigrants. Stop and searches, daily deportations and racist murders are the norm. With greater flexibility it represses the voices of those who fight against this misery with detention in police stations and false or framed arrests..

Now that the furious fight between countries for the separation of land and its materials and the exploitation of regions of the third world has sharpened, peaceful demonstrations and marches (just to do our duty) seem not only futile but fitting in the eyes of those whose purpose of their lives is to suck on humanity.

FOR US THE ANSWER, AND REAL SOLIDARITY TOWARDS THE REPRESSED ALL AROUND THE WORLD, IS CONTINUOUS SOCIAL WAR AND EVERYDAY INSURRECTION. LET'S SABOTAGE THE PLANS OF SOVEREIGNTY WITH A GENERALISED FIGHT AGAINST THIS MISERABLE CREATION CALLED STATE.

Angry punk
